

No scanning of the record magazine rack is necessary when the player desires to repeat a certain selection. This more efficient repeat action adds to the earning power of the phonograph — particularly with hit-tune records as it permits a greater total number of selections to be played in any given length of time.

THE LATEST —

**the most advanced phonograph
built — on time-tested basics!**

The outstanding position of the title strips on the Evans Century is at eye-level and easier and faster to read. The 20 button all number selector panel is well lighted and convenient at finger tips. The title strips (in holders) are easily changed at the same time the records are changed. The entire compliment of 50 records is in full view. Proper programming is easily arranged. Pay special attention to the Futuristic Selector when you see the Evans Century.
