BULLETIN NO. 160

TO: All Distributing Office Service Personnel

SUBJECT: Four-Coin System for the JBI-120

The JBI-120 Phonograph can be converted to 50¢, four-coin operation by installing an L-1281 Four-Coin Slug Rejector. The chart in the Model "H" Credit and Selection System Service Manual can be used to set up the desired price combination.

To accommodate the four-coin rejector, a few parts must be removed from the phonograph.

1. Remove the F-6304 Coin Slot Bracket. This is the bracket that restricts the coin slot so that a half-dollar cannot be inserted. It is held in place by the right-hand lamp socket mounting screw.
2. Remove the L-277 Three-Coin Rejector.
3. Remove the F-6577 Actuating Lever. This is the last section of the slug rejector scavenger lever system and is held in place with a retaining ring.
4. Unlatch the F-6650 Rejector Mount and remove the F-6578 Guide Bracket from it.
5. Replace the F-6650 Rejector Mount and install the L-1281 Rejector.
