BULLETIN NO. 135

TO: All Distributing Office Service Personnel

SUBJECT: F-2974 Revision Kit for R-1110 Pulse Converter

Beginning with phonograph G-200, serial number 357168, all machines will be furnished with pulse converters employing a gear drive between the selector drive motor and the sprag wheel.

In order to provide for field conversion from the friction drive to the gear drive, subject kits are now available. The use of this kit will not only provide gear drive but will also permit certain other revisions to be made, thus bringing the converters up-to-date. Each kit includes full instructions for use.
